

January 2019 Transition Regents Examination in Global History and Geography – Grade 10

Chart for Converting Total Test Raw Scores to Final Examination Scores (Scale Scores)

To determine the total score for Part I and Part IIIA, multiply the total number of Part I multiple-choice questions answered correctly by 2 and then add the total credits received for Part IIIA. For example, a student answering 22 multiple-choice questions correctly on Part I and receiving 9 credits on Part IIIA would have a total score for Part I and Part IIIA of 54: $22 \times 2 = 44 + 9 = 53$.

To determine the student's final score, locate the student's total essay score across the top of the chart and the total Part I and Part IIIA score down the side of the chart. The point where those two scores intersect is the student's final examination score. For example, a student receiving a total essay score of 7 and a total Part I and Part IIIA score of 53 would receive a final examination score of 80.
